THE TOOL THAT READS YOUR SETTINGS LIED TO ME

I read a setting, saw it was blank, and changed it. It was never blank.

THE READ CAME BACK EMPTY

I asked the tool what a value was set to. It told me nothing was there. So I set it, which is the reasonable thing to do when a required setting is missing.

The value had been there the whole time. The tool I asked simply does not display that one, and it reports the same empty answer either way.

WHAT EMPTY CAN ACTUALLY MEAN

WHAT I HEARD	WHAT IT MEANT
Not set	**Not shown**
Nothing is configured here, so configuring it is safe and probably overdue.	Something is configured here, and I am not going to tell you what, so writing over it is on you.

Two different facts, one blank field.

WHAT I DO BEFORE I WRITE NOW

01	Ask what the source of truth is, not what the dashboard says	FIRST
02	Read the value at the source, even when it is slower	VERIFY
03	Treat a blank from a viewer as unknown, never as absent	RULE
04	Write down what it was before I change it	UNDO
05	Check the thing the setting controls, not the setting	PROOF

The fourth one is the cheapest insurance in this whole list.

> **A blank field in a viewer is not a fact about the system. It is a fact about the viewer.**
>
> SAME SHAPE AS A PASSING TEST THAT NEVER TOUCHED THE BUTTON.

YOUR BUSINESS HAS THIS EXACT BUG

The report that shows no open orders for that client because their orders are filed under a second company record. The stock count that reads zero because the item was received under a different code.

Somebody then makes a completely rational decision on top of a blank that was never empty.

FIELDS I FOUND HOLDING SEVERAL VALUES AT ONCE

2

of my own columns were quietly stuffing multiple values into one string, so any tool reading them read one and missed the rest.

One held tracking numbers. The other held the trail of absorbed links. Both are on the list to be normalized rather than patched.

THE PLATFORM THIS CAME OUT OF

Promo shops can request access, and I will show the honest version, open items and all.

OPEN ITEMS PUBLISHED | ACCESS BY REQUEST | DEMO TENANT ONLY
