THE EMAIL YOUR CLIENT NEVER HAS TO SEND

A client should not have to ask a human where their own order is.

WHERE IS MY ORDER

It is the most common question in this business and the least interesting work in it. Somebody reads an email, opens three screens, copies a tracking number, and writes a reply that says in transit.

The client did not want a reply. They wanted the answer.

WHAT IS BEHIND THE LINK

01	Live jobs, with the status ladder from brief through delivered	PORTAL
02	Past orders, so a reorder starts from what they actually bought	PORTAL
03	Carrier and tracking on the job, the moment it exists	PORTAL
04	Messages on the specific job, not a shared inbox thread	PORTAL
05	A proof to approve, on a link with no login to remember	APPROVALS

A link plus a company password. No seat to buy, no app to install.

BUYING THE SAME THING AGAIN

THE USUAL

4 emails

What did we order last time, do you still have the art, what did it cost, can you send a quote.

THE SHOP

1 cart

A catalogue of what that client has already bought. The cart becomes a real quote on my side, with the artwork already attached.

No login on the reorder shop by design. Friction is how reorders die.

PROOF DECISIONS CLOSED OUT

98%

at a six minute median,
because approving a proof is
one link and two buttons.

The suite that asked people to log in and hunt for the file died at zero rows across six tables.

THE WALLS ARE DELIBERATE

/	Your cost, your supplier, your margin, ever	NEVER
/	Any other client, any other job, any other contact	NEVER
/	Internal notes, team discussion, the pipeline	NEVER
/	Files from a public link, every bucket is private and served to a session	CLOSED
/	The portal is read mostly, so a client cannot edit your record	CLOSED

WHERE THIS HONESTLY SITS

The portal and the reorder shop are built and working, and they have not been handed to a client book yet.

Two things are open before they are. Somebody has to be told when a client messages a job nobody owns, and the order totals in the portal need to come from the invoice rather than a summary. Both are on the page, in writing, where the team can read them.

Nothing leaves the building without a person. Six systems in here write email, and not one of them can press send.

WHICH IS ALSO WHY YOUR CLIENT NEVER GETS A STATUS UPDATE THAT TURNED OUT TO BE A GUESS.

WANT THE DOOR ON YOUR OWN BOOK

Access is by request. I will stand it up against your own jobs and let you click it before you decide anything.

LINK PLUS PASSWORD | NO CLIENT SEAT TO BUY | PRIVATE BUCKETS
